

## **Annotation 17**

### **Title**

**Description:** What is the Artifact? Who created it (and collaborated)? What is the context? How did it fit into the big picture? Whats it doing in the portfolio? We language.

**Reflection:** Insights gained as a result? Learning as a result of doing the activity that resulted in the artifact? I language.

### **Artifact 17**

- Sprint 6 (Oct 24th 2022 – Oct 31st 2022)
- Scrum Master: James
- Members: Tim, James, Zak, and Philip

Retrospective:

- What we did well:
  - Improved communication on what we can work on/current problems.
  - More available for helping each other out.
  - Finished more than last sprint (gauged tims abilities better)
- Not so well:
  - Did not finish all our cards
    - Speak up ahead of time if we foresee there will be blockers.
    - Break up blocking cards into subtasks that can get done.
  - More collaborative communication.
  - Utilize Trello poorly
  - Communicating if you are done / if you are struggling.
- Reflections/observations
  - Good progress – better than last sprint
  - Room is in a presentable state. We can start working on other elements.
  - More satisfactory work done. Progress was a lot more apparent.
