

Annotation 9

Title:

Description: What is the Artifact? Who created it (and collaborated)? What is the context? How did it fit into the big picture? What's it doing in the portfolio? We language.

Reflection: Insights gained as a result? Learning as a result of doing the activity that resulted in the artifact? I language.

Artifact 9

The image displays three columns of Trello cards, each representing a sprint. The first column is titled 'Sprint 5 Done' and contains six cards. The second column contains five cards. The third column contains four cards. Each card has a title, a progress bar, a description, and a list of assignees represented by colored circles with initials.

Sprint	Card Title	Assignees
Sprint 5 Done	add git ignore for package lock json [1]	SK
	Install the node daemon for easy development on the backend [1]	TT
	front end - grab messages from server and show them to the screen [2]	PM, TT
	add a better room page [3]	PM, SK
	clean front end files that aren't relevant anymore [1]	PM
	Add the use hash for the front end so reloading the page works [1]	TT
	Iterate on read me (add trello link and other useful information) [1]	PM, SK, SS, TT
	add angular tests for current functionality [3]	PM, TT
	Setup socketio to announce messages and better read them	SS
	clean back end file that aren't being used anymore [1]	SK, SS
	Restructure HandleIO function in index.js to it's own file [2]	SS
	Create Host Env Variable on server [1]	SS
	clean file structure for backend [1]	SS
	change setup file so it also runs the server or make additional script for that [1]	PM, SK, SS, TT
	catch up on back end tests for previous sprints [3]	SK, TT
