Title

Description

Reflection

Artifact 15

- Sprint 5 (Oct 10rd 2022 - Oct 17th 2022)
- Scrum Master: Zack Khalidov
- Members: Tim, James, Zak, and Philip
- We did well:
 - Philip
 - This sprints communication was improved since last sprint. Emphasizing on group coding helped mitigate some communication barriers.
 - James
 - We prioritized on the goals set at the beginning of the sprint and executed them before the end of the sprint.
 - Tim
 - We did better collaborative coding on front end and back end.
 - Zak
 - Splitting up into teams was advantageous for learning and developing.
- Needs improvement:
 - Philip
 - We do a good job of writing tests but would write them after or during the implementation of the desired functions. We need to improve on implementing TDD and focusing on writing tests before implementation.
 - Solution: Write notes on intent and discuss with team member to write tests and then start implementation.
 - James
 - Communication is better but there is room for improvement.
 - Solution: continue group development. Put more emphasis communicating with team member.
 - Tim
 - Learning more about the other aspects of the code base.
 - Solution: we will be swapping a single team member from the current groups.
 - Zak
 - Managing pull requests, having a system of who reviews and who merges.
 - Solution: Your team member will be responsible for review, then the creator of the pull request will merge.
- Finished 13 out of 17 cards
- General Notes: Notify on chat when pull request are made. The individual requesting the pull request is to merge after reviewer has made their comments. We will be switching team roles to force ourselves to work on other aspects of the codebase.
- Next Scrum Master: Tim
